/MISSION/

*Hello!
We require your help!*
As part of the N.A.S.A it is
required to send an important message
to the International Space Station!

It is confidential so
only one person can read it...

Let's encode our message!

/WHAT IS 'CRYPT'?/

*From the Greek _Kryptos_, it means _"Hidden"._

It had been representing, through time, a way to send secret messages from governments, countries, or persons each other.

The first known use of a modern cipher was by **_Julius Caesar_** 100 B.C., who did not trust his messengers when communicating with his governors and officers.
